## **DETAILED ACTION**

## Restriction

- 1. The examiner for this application has changed. Please indicate Examiner Andrew J. Fischer as the examiner of record in all future correspondences.
- 2. Restriction to one of the following inventions is usually required under 35 U.S.C. §121:
  - I. Claims 24-33, drawn to a method of selecting at least one file, classified in class345, subclass 661.
  - II. Claim 34, drawn to a medium, classified in class 717, subclass 120.
  - III. Claims 35 and 36, drawn to a system, classified in class 705, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

- 3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). It is the Examiner's position that Inventions I and II are not patentably distinct. Therefore, if Applicants select Invention I, Invention II will also be examined. And if Applicants select Invention II, Invention I will also be examined. However, should Applicants amend either Invention I or Invention II such that the inventions then become patentably distinct, the two inventions will be restricted at that time.
- 4. Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as

Application/Control Number: 09/738,471

Art Unit: 3627

claimed can be practiced by another materially different apparatus—one that does not require the second computer effective to receive a file from the first computer.

- 5. Because these inventions are distinct for the reasons given above, because these inventions have acquired a separate status in the art as shown by their different classification and divergent subject matter, and because the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to Steven S. Rubin on or about December 3, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. §1.143).
- 8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. §1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. §1.48(b) and by the fee required under 37 C.F.R. §1.17(i).
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew J. Fischer whose telephone number is (703) 305-0292. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Olszewski Robert can be reached on (703) 308-5183. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
